## NOW IS THE TIME for Encrypted Document Presentment

### Encrypted Document Presentment Secure Document Delivery

Encrypted Document Presentment is a managed encryption service that enables organizations to efficiently and securely distribute large volumes of confidential data directly to their customers' inbox.

This alternate solution to paper and postage encrypts confidential information, as well as automates the distribution of confidential mass mailings such as bank statements, insurance forms, bills, application forms, etc.,

Encrypted Document Presentment not only saves time and money, it dramatically reduces an organization's carbon foot print.

With the high adoption rates of online banking and other transaction-based services, paperless delivery of encrypted confidential information is more accepted and in many cases, a preferred option from an environmental standpoint.

### Promotions & Advertising

With electronic documents, individualized marketing messages can be easily bundled with confidential statements and branded with the company logo, colors, etc.

Targeted marketing messages can create cross-selling/up-selling opportunities and drive new revenue streams by promoting cross-selling and up-selling opportunities.

### How it Works

Depending on customer preferences, encrypted statements can be delivered directly to the customer's inbox or held for access via a secure portal.

To decrypt the message, the user downloads a free and fully branded Reader, clicks the message, enters their password.

Users who choose to pick up their statements directly from the secure portal will receive an email notification when the statement is available. They can then login to the portal to view their statement.

## Highlights

- Enables secure delivery of confidential information and bank statements
- Offers an alternate solution to paper and postage
- Encrypts confidential information
- Automates the distribution of mass mailings including bank statements, insurance forms, etc
- Provides an opportunity for customized promotions and advertising
