

mobilEncrypt ENDPOINT

Your on-the-device encryption solution for mobile users!

With mobilEncrypt ENDPOINT

- Mobile users can send and receive encrypted messages right on their device using a true end-to-end email encryption solution.
- mobilEncrypt is powerful for the enterprise and easy to use for the employee.
- Enterprises can choose to provision iPhones; iPads; BlackBerry and Android (coming soon) devices.
- With mobilEncrypt ENDPOINT, enterprises can leverage their existing mail infrastructure without having to upgrade or displace any existing mail technology.

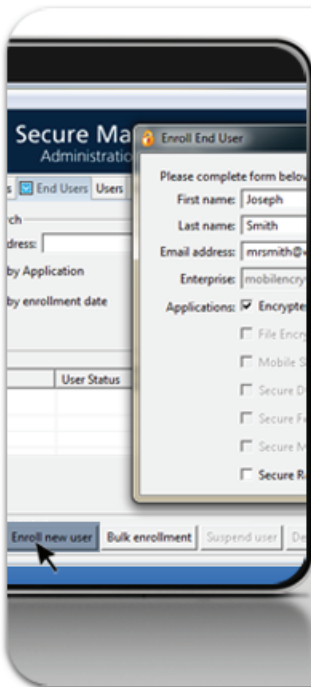

Benefits for the Enterprise

End-to-End Email Encryption

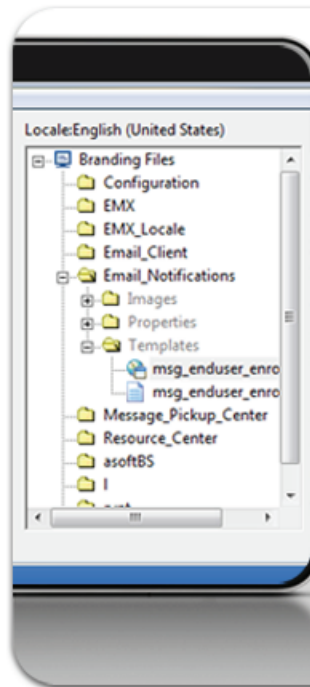

- All messages are received and stored encrypted on the device
- The credentials are stored encrypted on the device in the native keychain or keystore (patent pending)
- User activation, provisioning, and credential management are all done over-the-air (iOS only)
- Encrypted data will not be compromised if the device is lost, stolen or hacked
- Secure messages are stored on the phone, and sent messages are available for archiving
- Draft messages are automatically saved
- Enterprise users can send encrypted messages to anybody using their existing email account
- Non-mobilEncrypt users pick up encrypted messages from a secure pickup center
- Enables strong authentication with a local key and a password
- Issues PKI X.509 certificates that are backed by a globally recognized Certificate Authority
- Easy to use enterprise tools for bulk enrolling users, revoking certificates, key recovery, password recover, and customized branding

Powerful Enterprise Features & Functionality

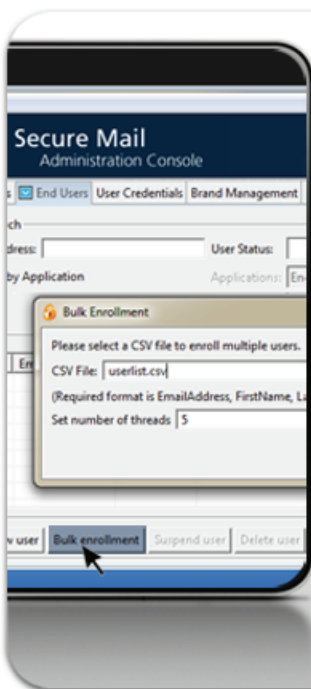

Activating a New User

- Login to the admin console
- Choose “end users” tab
- Choose “enroll new user” button
- Enter first name, last name, and email address
- Click “enroll”
- A unique activation email is automatically generated

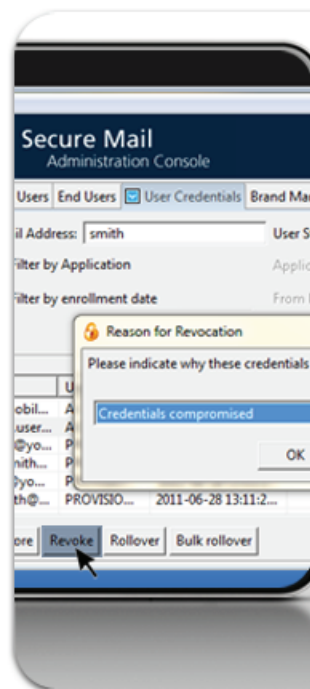

Customized Branding

- Customized branding available for message pickup portals, notification emails, and general interface

Bulk Enroll Employees

- Login to the admin console
- Choose “bulk enroll”
- Select a CSV file of employees you would like to enroll
- Choose “enroll” and the system automatically generates an activation email for each user

Revoke Credentials

- Login to the admin console
- Choose “revoke” credentials
- Select the user you want to revoke
- Insert password
- Choose “revoke credentials”

ABOUT ECHOWORX

Echoworx Corporation is the leading provider of managed encryption services for complete enterprise email and data protection. The company is an encryption service provider of choice for, Symantec, AT&T, Verizon, McAfee, BT, Intermedia and Clearswift among other global resellers. Echoworx provides a SaaS (software as a service) model; it is built on best-of-breed technology and reduces encryption complexity for the end user. With Echoworx, organizations can protect their email and data without changing their day to day workflow and can easily send encrypted documents and digitally signed email messages to anyone in their address book. For more information:

To learn more about **mobileEncrypt ENDPOINT** on-the-device email encryption, please call North American Toll Free: **1.888.697.3246** or Canada: **416.226.8600** or Europe: **+44.020.7419.8763** or visit www.echoworx.com

Easy to Use for the Employee

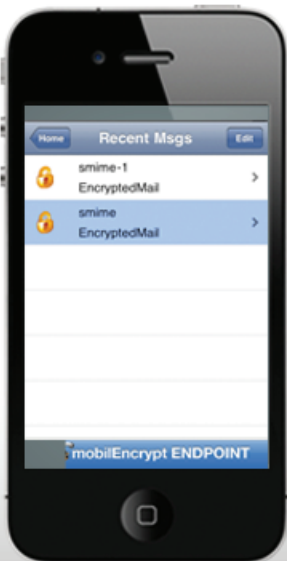

Home Screen Actions

- Compose a new message
- View Draft messages
- Review sent message

Compose a New Message

- Open the app and choose "compose"
- Compose an email and click "encrypt"
- Content is immediately encrypted
- To digitally sign the message, enter your password and then choose "send"

View a Message

- Simply click on the message
- Enter your secure password which decrypts the message for viewing
- Choose "verify" to see the sender's profile (optional)
- Note: The message indicator will automatically highlight any problem emails

Non-mobilEncrypt Users

- Once the message has been sent
- mobilEncrypt detects that the recipient does not have credentials
- It automatically forwards the message to the pickup center
- An email notification is then sent to the recipient
