

IT PAYS TO BE SECURE

Echoworx Email Encryption

HIGH PERFORMANCE EMAIL DATA PROTECTION FOR ANY ENVIRONMENT

Echoworx's Email Encryption Platform is a high-performance email data encryption service – designed to protect the information and documents you are sending through email at all times.

PRODUCT SUITE

Echoworx Email Encryption Platform

Our boundary-based high-performance email data encryption service provides multiple ways to protect both inbound and outbound communications so you can meet the reality of what the business needs.

Echoworx Email Encryption: One Delivery Method

Provides organizations with the option to select a single secure delivery method from our email data protection platform.

Echoworx Email Encryption: Volume Documents

Designed for intensive demands and mass distribution, this option enables organizations to send virtually unlimited amounts of encrypted documents and secure statements.

KEY DIFFERENTIATORS

Numerous Delivery Methods (Push/Pull)

- Web Portal, TLS (with fallback), Encrypted PDF, Encrypted Attachments Only (PDF, ZIP, Office XML), S/MIME and PGP making it easy for both senders and recipients to use, particularly on mobile devices.
- Empowering users to choose their preferred secure delivery method – including options requiring no registration.
- Optimized mobile user experience. (iOS, Android)
- Full key and certificate management including expiry, rollover and even bulk upload.
- Policy-based message routing enforces email encryption based on predefined policies.

Extensive Brand Protection and Customization

- 28 language options – including double-byte characters (e.g. Chinese, Japanese) along with a tailored interface, ensuring the experience is not affected by selection or customization.
- Multi-branding conditions are easily applied through policies at both the profile and template level for organizations operating under multiple banners or lines of business.
- Customizable inline message warnings in both the header and footer.
- SMTP (DMARC) routing available for all outbound messages.

Authentication Controls and Access

- Authentication set by policy, sender or recipient.
- Options include: Full OAuth access (Office 365, Gmail, Hotmail, Facebook, LinkedIn and Salesforce), Self-Registration, Shared Secret Passphrase, SSO, System Generated Verification Codes, Passkeys, Biometrics and Multi-Factor Authentication (MFA).

Message Visibility and Recall

- Detailed reports provide statistics, troubleshooting and audit trail information including email opened, forwarded and recalled.
- Message receipts, message recalls and notifications without PowerShell or L2 Admins.

MAXIMIZE YOUR IT PERFORMANCE WITH SMARTER INVESTMENTS

Boasting an impressive yearly renewal rate exceeding 98%, we pride ourselves on delivering a seamless blend of robust email data protection and user-friendly experiences.

OPTIMIZE YOUR RESOURCES

Our singular focus is safeguarding your email data. Our contemporary, forward-thinking product roadmap is designed to not just meet today's business requirements but also anticipate and address future demands.

TAKE CHARGE OF YOUR DATA

With data centers in the US, UK, Germany, Ireland, and Canada, Echoworx ensures your data remains under your jurisdiction, especially crucial in a world where over 60 countries have enacted privacy laws due to evolving digital privacy concerns.

AMPLIFY YOUR DIGITAL GROWTH

Our comprehensive email data encryption platform amalgamates email and document delivery into one robust system, tailored to support your demanding needs and drive cost-efficiency.

BOOST YOUR OPERATIONAL EFFICIENCY

Echoworx seamlessly integrates with your existing workflow and a variety of 3rd party email gateways including Office 365 and G-Suite, whether your operations are on-premises, cloud-based, or a hybrid of both.

CONFIRM YOUR SECURITY ASSURANCE

Our security practices have undergone rigorous audits encompassing all facets of our business, earning us numerous certifications including AICPA/CICA WebTrust Certification, SOC2 Audit, PCI DSS Level 1 Certification, FSQS (Financial Services Qualification System), and Microsoft and Apple Root Member Certifications.
